Autonomy

Adaptability

Teamwork

Versatility

I am a 2nd year Network and Telecommunications student, specializing in Cloud and System Development at IUT de Colmar. I am passionate about network infrastructure, cloud computing and cybersecurity. Through my university projects, practical assignments and internship experience, I have built strong skills in system administration, network configuration, virtualization and IT asset management. I am looking for an apprenticeship starting September 2026 in networking, systems, cloud or cybersecurity.

EXPERIENCE

Systems & Network Administrator

IUT of Colmar - Since October 2024

- Virtualization : VM management (VirtualBox, Docker)
- Automation : scripts, deployment, supervision
- Security : Windows & Linux environments

Network Technician

IUT of Colmar – November 2025

- Network design and configuration (IP addressing, VLANs, dynamic routing, ACL)
- Installation and management of workstations under Linux and Windows
- Windows system deployment (images, initial configuration)

IT Support & Systems Intern

Banque Alimentaire of Bas-Rhin -April 2026 – June 2026

- Automated printer monitoring via GLPI and SNMP
- Scan to Email configuration on HP Color LaserJet MFP E57540
- GLPI ticketing system deployment
- Incident resolution : Gigaset DECT phones
- Microsoft Office license inventory on 24 workstations (PowerShell)
- IT asset management (Windows Server 2022, Docker)

EDUCATION

BUT Networks & Telecommunications – DevCloud track

IUT of Colmar
Since September 2025

BUT Networks & Telecommunications

IUT of Roanne
September 2024 - June 2025

General Scientific Baccalaureate

Lycée Cherif Samsidine Aidara (Senegal)
October 2023 – July 2024

SKILLS

Computer Networks

- Configuration and management of Cisco equipment (TCP/IP, VLANs, static and dynamic routing)
- Network services : DHCP, DNS, Active Directory
- Management and security of Windows & Linux environments
- User support and client workstation installation
- Network simulation and analysis : Wireshark, Packet Tracer (Cisco), VirtualBox (VM), VMware

Telecommunications

- Installation and maintenance of transmission media (LAN cabling, fiber optic)
- VoIP / IP Telephony
- Fiber optic

Cloud & DevOps

- Virtualization & Cloud : VirtualBox, Docker
- Automation & Programming : Python, C, JavaScript, Bash, SQL
- DevOps Tools : Git, GitHub
